## WORLD PORT DEVELOPMENT

International Journal for Port Management

World Port Development is an independent publication that strives to offer balanced and informed reporting, providing a complete overview for all concerned. We talk to manufacturers, operators, port staff and customers to present the whole picture, not a one-sided argument.

In tune with our readership, and their concerns, World Port Development acknowledges their needs and interests, and our editorial staff report with a vigour and enthusiasm that distinguishes us from unchallenging magazines that report ABOUT ports and terminals. We place ourselves on the industry frontline, and report from within the maritime sector FOR ports and terminals.
