

“We Compete in World Classification”

2016 was a very important year for MIP. The new terminal we built within the scope of the Expansion Project (East Mediterranean Hub-EMH) commenced serving the shipping lines. This year we achieved our goal of hosting mega ships. We have improved our competitive position in the world with our enhanced infrastructure and high-tech equipment.

Our total investment amount so far has exceeded 1 Billion USD including 170 Million USD spent as part of the Expansion Project launched in 2014. Today we are one of the world's 100 largest ports with 2.6 Million TEU container / 9 Million tons conventional cargo handling capacity. With our new investment, we have become a port which is able to serve the largest container ships sailing in the world's oceans. We have more than 100 port connections with the 17 container operators calling us. Because of this, the East Med Hub Terminal is a high value-added investment for both Turkey and Mersin.

We have achieved a great success with EMH Terminal but we will not rest on this. We will continue to look ahead and work on the next investment called “EMH2”. Our aim is to develop this high-tech port in the country which is able to meet all needs of the industry.

I would like to thank and present my respects to all of our customers, associates and union who contributed during our development process and of course to all my colleagues who are strong, success-oriented and pioneers in the industry with their corporate loyalty.
